PLAYING THE GAME

Keyboard Controls

Z = left X = right ; = up / = down
SPACE = reverse direction of balls

Zolyx can be played with a joystick connected to your Amstrad Computer.

The object of Zolyx is to fill in 75% of the screen by creating sections of blocks, while at the same time avoiding the balls. Contact with any of the balls, which are in constant motion, will result in the loss of a life.

On the first level there are three balls on the screen and two in the background. For each level successfully completed, one ball is added to the screen.

The direction of the balls can be reversed by pressing the fire button. This facility can be used once on the first level and an additional time for each level completed.

A bonus is awarded for every 1% above 75% of the screen filled in. Up to a maximum of 99% of the screen can be completed.
